

SkyPal XL Skype Cordless Phone

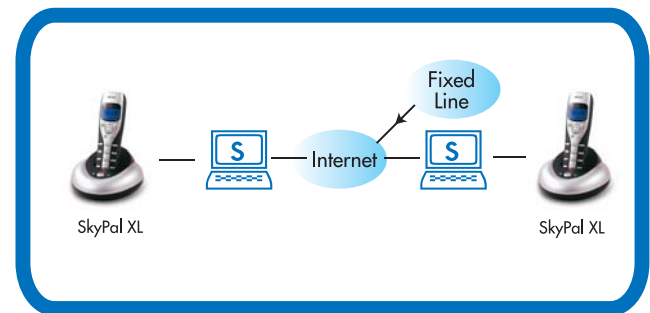

OVERVIEW

SkyPal XL Skype USB Wireless Phone.

Prefer mobility when making Skype calls? Then the SkyPal XL Skype USB Wireless Phone is your only option. It consists of one base and one handset. The LCD with blue back-light can show the contact list and calling history in any language.

Because it is cordless, you can move away from your computer at least 160 feet, instead of being attached to the computer when making calls. A high quality speaker-phone is built into the base to provide truly handsfree calling.
